DID YOU KNOW...

At the beginning of the 18th century, the Swedish naturalist Carl Linnaeus planted the first flower clock in the Botanical Garden in Uppsala, Sweden. He created a round flower bed divided into 12 parts. The whole thing was based on the characteristic hours of opening and closing of petals for different types of flowers, so you could determine the time of day just by looking at the garden. If you do not have this type of garden, wall clocks also work well.

Because of big digits the current time can be easily read and the whole clock gains trendy look.

Power bank

Reliable power source Anytime, anywhere

Nearly 75% of global population uses mobile devices

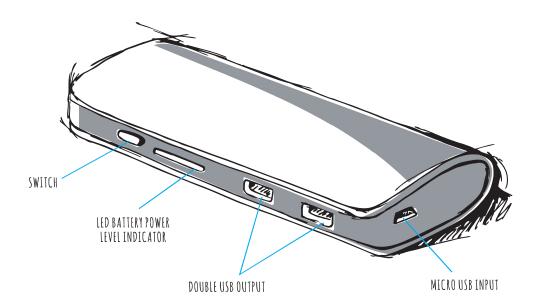

1 in 3 people complains about short-lasting batteries

Every new generation of mobile devices requires more energy

Important to know!

It is worth remembering that during charging, inevitable energy losses occur, which may reduce the real power bank efficiency to as much as 75%. This is a completely natural phenomenon and should be taken into account when selecting the capacity of the power bank.

mAh miliampere-hour

mAh is a miliampere-hour, the unit for batteries capacity. The value in mAh means how many energy can be storaged. Power banks with higher mAh capacity can recharge more devices.

USB ports the more, the better

Power bank may have more than one USB output, which allows you to charge multiple devices simultaneously. Each output may have different amperage dedicated for different mobile devices.

PAY ATTENTION!

Durability

You don't have to connect or disconnect your devices every time, so you can avoid damaging the USB connector.

Convenience

Place the phone on a dedicated charger (induction board) and it will start charging. You can reach for it at any time and leave.

Aesthetics

Original designs make your charger a decorative element as well.

Induction

Charge the phone without connecting it to the charger

Is inductive charging safe for people?

According to information provided by the World Health Organisation, to date scientific evidence does not support the link between symptoms (such as headaches, anxiety and nausea) and exposure to electromagnetic fields. Their occurrence can often be caused by noise or by concerns about the presence of new technologies.

The level of radiation emitted by wireless chargers is much lower than emitted by other household appliances such as microwaves, mobile phones, televisions and vacuum cleaners.

IT IS WORTH REMEMBERING!

Do not place the charger in close proximity to strong electromagnetic fields such as other induction chargers. The recommended distance should be at least 3 cm.

7x longer lasting than a conventional A-type USB plug

one universal connector to be used on a wide range of devices

easy-to-use p**l**ug

A new type USB connector shape

USB Type C (also called "USB C") connector is user friendly. There's no up or down orientation so it works regardless of which way you plug it in. Also both ends of the cable feature the same kind of connector. Over the last couple of years, USB Type C has become more available and popular. It's on track to become the industry standard for USB connections in the future, because of several innovations and technological enhancements that make it an exciting advancement in USB technology.

Universality

USB type C can be used not only as AC and USB power connector, but also as a headset and HDMI connector.

DID YOU KNOW...

The pen prototype was invented in 1938 by a Hungarian journalist and newspaper publisher Laszio Biro, but the first patent for this type of writing instrument was granted 50 years earlier. In 1888, John J. Loud presented a roller pen to the world, but his invention did not gain recognition in the eyes of his contemporaries and only half a century later, perfected by Biro, it became obvious choice for writing.

Touch pen

Friend of every touch screen.

No scratches

Clean screen

Precision

Touch Pen is a useful gadget for every mobile device owner. It makes using touch screens possible anywhere, anytime and regardless of the weather.

Use for multimedia presentations

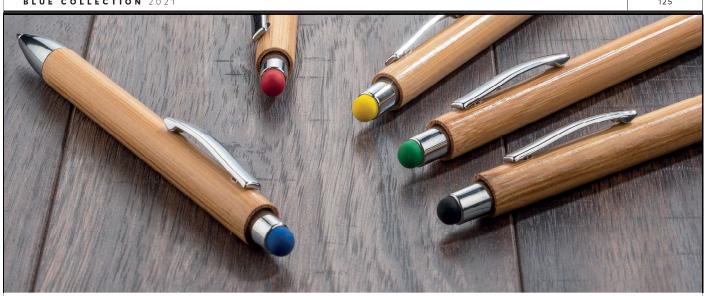

Use in winter, while wearing gloves or in bad weather conditions

How does the touch screen work?

Most of the mobile devices are equipped with a capacitive touch screen. By touching the screen, a local electric capacity in the given point is changing – and this action is read by the device. This type of touch screen won't respond to cold hands, gloves or plastic stylus.

Pens are not only useful for writing. Fisher Space Pen Company boasts that in 1969 the pen helped Apollo 11 succeed in its mission. During a capsule crash on the way back from the moon, astronauts used a pen instead of a broken button to return to Earth. "Buzz" Aldrin, one of the members of the Apollo crew, still holds this pen as a priceless treasure that saved his life.

Notebook

Always fashionable.

3 reasons why it's good to have a paper notebook

- note your thoughts and observations without distracting yourself with electronic devices
- handwritten notes give better results and allow better remembering of information
- a paper notebook will not run out of battery power or break down when you drop it on the ground

DID YOU KNOW...

When traveling around the world, you can find as many as 14 different types of electrical sockets. The types of sockets have been defined by the International Electrotechnical Commission, using the letter names from A to N. Most European Union countries use one of the most popular sockets in the world: type C sockets. However, it is worth checking the situation in a given country and taking the adapter with you before going on a trip.

Power plugs in EU, US, UK and AU standards.

MADE OF PAPER

It is not the best idea to wash paper. Surely, you know that. But what you probably do not know is that our paper bags are not afraid of getting wet. With synthetic latex impregnation, the cellulose that is used to manufacture them does not lose its properties even after laundering. The material which our bags and backpacks are sewn of is often referred to as leather for vegans because its production does not require the use of any ingredients of animal origin.
